## Session Descriptions

### NSSE and Large-Scale Events: Threats, Security, and Planning

SAIC Baisel and SAC Farley will lead a discussion on how the National Special Security Events Credentialing (NSSE) and large-scale events are handled with regard to threats, security and planning. The session will focus on communication and relationships as the main ingredients to a successful security event as well incorporate the private sector, especially those whose company sponsors parts of the event

### The 3 C's – Consular, Crisis and Contacts

Building contacts ahead of big events such as the World Cup or the Olympics is common sense, but what about during normal times? Have you ever wondered what an Embassy or Consulate does? Have you ever wondered what a Foreign National does when they need assistance overseas? Atlanta is an International City with over 60 countries represented. A general overview of how the Consular Services, in normal times and in crisis, engages with law enforcement and emergency management.

### Preparing the City

The City of Atlanta is overseeing public safety and security planning, preparedness, and operations for the upcoming 2026 FIFA World Cup. Robust interagency collaboration, private sector partnerships, cross-functional coordination, and advanced technology integration are central to this effort. The objective is to safeguard all stakeholders while maintaining seamless event and business operations through organic and systematic safety and security measures and contingency planning.

### Special Event Emergency Preparedness

This presentation provides public safety personnel and event planning staff with information related to pre-event planning, forming the planning team, event hazard analysis, risk assessments, and responding to incidents during special events in their community.

Learning Objectives: After the Panel Discussion, attendees will be able to:

- Define special events.
- Identify special event planning team members.
- Conduct a hazard analysis and risk assessment for a special event.
- Utilize the Incident Command System (ICS) during each phase (planning, execution, and demobilization) of your special event.

### Human Trafficking

Rooted in the foundational pillars and priorities of the interagency National Action Plan to Combat Human Trafficking, which President Biden released on Dec. 3, 2021, the Justice Department's National Strategy is expansive in scope. It aims to enhance the department's capacity to prevent human trafficking; to prosecute human trafficking cases; and to support and protect human trafficking victims and survivors. Strengthen engagement, coordination, and joint efforts to combat human

trafficking by prosecutors in all 94 U.S. Attorneys' Offices and by federal law enforcement agents nationwide.

Establish federally funded, locally led anti-human trafficking task forces that support sustained state law enforcement leadership and comprehensive victim assistance. Step up departmental efforts to end forced labor by increasing attention, resources and coordination in labor trafficking investigations and prosecutions. Enhance initiatives to reduce vulnerability of American Indians and Alaska Natives to violent crime, including human trafficking, and to locate missing children. Develop and implement new victim screening protocols to identify potential human trafficking victims during law enforcement operations and encourage victims to share important information.

### Working with Security Teams

Given the level of "passion" surrounding the international sport of "football" and the increased pressure brought to bear by playoffs, it will be no surprise that numerous people including team owners, coaches, players, and many wealthy fans will opt for personal safety in the form of public or private protective personnel or teams. As Atlanta will be the host for the 2026 FIFA World Cup, we are certain to see a number of these security teams in our city. Of these, though, how many are officially sanctioned and/or licensed, and how many are, at best, "unofficial?" How do we recognize one from the other and how do we coordinate, if at all, with these teams? Learning Objectives: After the Panel Discussion, attendees will be able to:

- Recognize the difference between a credentialed security team and a loose gang of "armed muscle."
- Communicate and coordinate with the credentialed security team.
- Coordinate with, but monitor and/or contain, the "unofficial" security team.
- Facilitate the communication and interaction of two foreign-national teams that are meeting for the first time.
- Better understand some of the Georgia laws affecting both public sector and private sector security.

### Interoperable Communication

Creating a region-wide public safety radio network comes with a number of challenges, including disparate spectrum, LMR systems from different vendors, and the need to support multiple admins as well as local control requirements. This presentation will discuss how cloud interoperability makes creating a system of systems possible by providing the interoperability framework needed for agencies to share and control resources. The resulting virtual network allows public safety to communicate seamlessly across jurisdictional boundaries.

## **Speaker Bios** **(in Alphabetical Order)**

### **SCOTT ASHWORTH**

Scott started his career in law enforcement, spending nearly a decade serving communities of metro Atlanta. He left full-time law enforcement as a Lieutenant over investigations with the Forest Park Police Department to begin a new path in sports security.

In 2017, he joined Atlanta United FC of the MLS to head up the organization's security efforts including the protection of a state-of-the-art 60 million dollar training center. Scott worked closely with the other experienced leaders at AMB Sports and Entertainment to mature Atlanta United's security operation into a world-class program.

Joining another skyrocketing sports brand in 2021, Scott took on the role of Head of Safety and Security for Overtime Elite. ## Appreciation

We would like to acknowledge the assistance of the Georgia Association of Chiefs of Police; Georgia POST Council; ASIS of Greater Atlanta; and the Georgia Board of Private Detective and Security Agencies for allowing continuing education credits to be awarded to attendees.

We are also grateful for the support of Chief Paul Guerrucci, Director of Public Safety for the Georgia World Congress Police Department and his staff. They worked hard to insure that we had the space and set-ups that we needed to make the event successful.

Thank you to ONSite Audio Visual for providing excellent services for all of the audio-visual equipment and AV tech services we are using for the Summit, and to Levy Premium Foodservices for the meals and breaks.

## Evaluation

The planning team is very interested in what you thought of the training, and we would love to hear about any ideas you have for improvement or topics for next year. You have the ability to evaluate each session and the overall summit as it progresses or complete at a later date. Please scan the QR code below (or type in the link in the web browser of your device). Each session and the overall rating has a separate evaluation.

If you have any questions on accessing the evaluation or need technical assistance, please contact Nadia Borissova (onsite) or via email at [nborissova@gsu.edu](mailto:nborissova@gsu.edu)

Thank you for taking the time to complete the evaluation!
